Lab Exercise 3- Working with Git Rebase

| Name- Misha (B2 DevOps) |
|--|
| SAP ID - 500119679 |
| This exercise demonstrates the use of git rebase in a scenario where no conflicts occur. |
| Objective |
| |
| 1. Learn how to rebase branches when there are no conflicting changes. |
| 2. Understand the clean, linear history created by git rebase. |
| |
| Prerequisites |
| git init git-rebase-lab |
| cd git-rebase-lab |
| PS C:\Users\Misha\git-revert-lab\git-reset-lab> git init git-rebase-lab Initialized empty Git repository in C:/Users/Misha/git-revert-lab/git-reset-lab/git-rebase-lab/.git/ PS C:\Users\Misha\git-revert-lab\git-reset-lab> cd git-rebase-lab |
| PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> |

Step-by-Step Instructions

1. Set Up the Repository

1. Create the main branch and make the initial commit:

```
echo "Line 1 from main branch" > file.txt
git add file.txt
```

```
PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> echo "line1 from main bran ch" > file.txt

PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git add file.txt

PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git commit -m "initial com mit add line1 from main branch"

[master (root-commit) c23c04b] initial commit add line1 from main branch

1 file changed, 0 insertions(+), 0 deletions(-)

create mode 100644 file.txt
```

2. Create a new branch feature-branch:

```
git checkout -b feature-branch

PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git checkout -b feature-branch
Switched to a new branch 'feature-branch'
```

3. Add a new line to file.txt in feature-branch:

```
echo "Line 2 from feature branch" >> file.txt
git add file.txt
git commit -m "Add Line 2 from feature branch"
```

```
PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> echo "line2 from feature branch" >> file.txt

PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git add file.txt

PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git commit -m "add line 2 from feature branch"

[feature-branch 264eb1f] add line 2 from feature branch

1 file changed, 0 insertions(+), 0 deletions(-)
```

4. Switch back to the main branch and add another line:

```
git checkout main

echo "Line 3 from main branch" >> file.txt

git add file.txt

git commit -m "Add Line 3 from main branch"

PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git checkout main
Already on 'main'
PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> echo "line3 from main branch" >> file.txt
PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git add file.txt
PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git commit -m "add line3 from main branch"
[main cfe9e00] add line3 from main branch
1 file changed, 0 insertions(+), 0 deletions(-)

C C:\Users\Misha\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-lab\git-payout-l
```

2. Rebase feature-branch onto main

1. Switch to feature-branch:

```
git checkout feature-branch

PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git checkout feature-branch
Switched to branch 'feature-branch'
```

2. Rebase feature-branch onto main:

git rebase main

PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git rebase main Successfully rebased and updated refs/heads/feature-branch.

Git will replay the commit from feature-branch onto the main branch. Since there are no conflicts, the rebase completes automatically.

3. Verify the Rebase

1. View the commit history:

```
git log --oneline —graph

Saccessfutty rebased and apuated resplicatory reactive branch.

PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git log --oneline cfe9e01 (HEAD -> feature-branch, main) add line3 from main branch c23c04b (master) initial commit add line1 from main branch PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> git log --oneline --graph cfe9e01 (HEAD -> feature-branch, main) add line3 from main branch c23c04b (master) initial commit add line3 from main branch to c49e01 (HEAD -> feature-branch, main) add line3 from main branch to c23c04b (master) initial commit add line1 from main branch
```

2. Check the contents of file.txt:

```
PS C:\Users\Misha\git-revert-lab\git-reset-lab\git-rebase-lab> cat file.txt
line1 from main branch
line2 from feature branch
line3 from main branch
```
